

## Machines Ideal for the Contract Packaging World

Mactec Packaging's line up of small footprint and versatile packaging machines are the ideal fit for contract packaging operations across a variety of industries. Designed for quick change-over, often in 10 minutes or less, the machines allow for multiple products to be run through the same machine. Package nutraceutical tablets in the morning and in the afternoon be packaging medical devices on the same machine. Our highly versatile designs are suited for unit dose packaging of liquids, capsules, powders and devices. Whether a blister package, pouch / sachet or bottle / vial, our machines are a favorite of contract packagers in several industries.

Pharmaceutical

Nutraceutical

Medical Devices

Cannabis & CBD

Animal Health

Life Sciences

Food & Beverage

Coffee & K-Cups

Chemical

Cosmetics

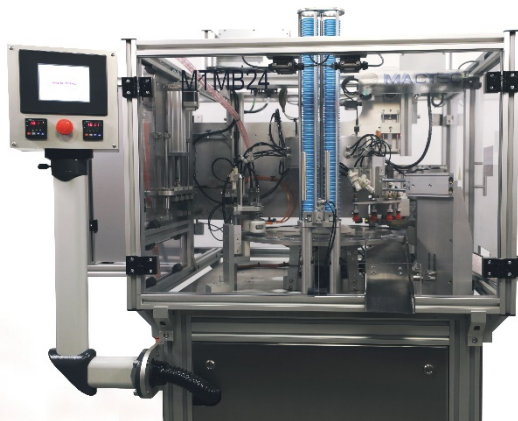

Hospital & Small Pharmacies

What other features make Mactec's portfolio of small footprint packaging machines so appealing to contract packaging companies?

- Ease of use by a single operator
- Fast and easy installations – our machines require only electrical power and compressed air, and they can be easily moved on the standard castors as your production floor requirements evolve
- Ability to meet FDA standards with optional cleanroom configurations
- Short lead times on standardized machines get you in production within a few months
- In-house team of design engineers work with you and or your end-customer to design and engineer customized packaging solutions
- All machines are designed, engineered, and manufactured in the USA out of Mactec's NJ facility
