

Mactec Packaging Technologies Names Gregory Rizos as President

Sayreville, NJ, June 13, 2022

Mactec Packaging Technologies, a leader in small to mid-scale unit-dose packaging machines, announces Gregory Rizos as its new President. Greg has extensive experience in the world of custom machinery having spent 15+ years helping to grow what is now an industry-leading company manufacturing high-performance converting machinery, slitter rewinders, and process lines. Mr. Rizos earned his B.S. in Mechanical Engineering from Clarkson University where he still serves as an Honors Program Mentor to current students.

“Under the leadership of Dave Byer and Scott Oakford Jr., Mactec has become the go-to solutions company for customized unit-dose packaging machinery. Their commitment to delivering reliable, quick-changeover, American-made machines to their customers is at the heart of what Mactec does so well. I am excited for the opportunity to work with Dave, Scott, and the excellent team at Mactec to help lead the next stage of growth,” said Mr. Rizos.

Dave Byer, Mactec’s transitioning President will remain with the company as Director of Business Development. Over the last several years, Dave has helped transform Mactec from a small family-owned manufacturing company into a significant player in the small to mid-scale market for packaging equipment.

Green Arc, LLC (www.greenarcllc.com) and Mactec’s extended ownership group are excited about its future and growth opportunities on the horizon. We believe with Greg’s operationally focused background and extensive experience in engineered-to-order industrial machinery, the organic growth of Mactec will continue while the Company remains focused on its commitment to customer service, employee satisfaction, and quality.

About Mactec Packaging Technologies

Mactec Packaging Technologies is a made-in-the-USA designer and manufacturer of blister, pouch, and rotary packaging machines suitable for small to medium scale production in pharmaceutical, nutraceutical, cannabis, medical device, R&D, and various other applications.
